# Mythic+ Season 2 — 2026-10-16

Whole conversation · Generated 2026-10-20 16:33 UTC

## Summary

An analysis of Mythic+ log data was conducted for the player **Veritass** playing Devourer Demon Hunter (ilvl 314) across two +10 runs in report `rKCwfWFRxMdzX7Vj` (**Temple of Sethraliss** and **Den of Nalorakk**). Performance was evaluated on throughput, death timelines, rotational ability priority, buff uptime engine mechanics, and direct comparisons against a benchmark #1 parse (**Chandemon** in Sethraliss +21, report `pTZrj1AX7HdzhtkL`).

## Key Findings

- **Throughput & Ranking Variation:** Veritass logged **140.8k overall DPS** (65th percentile bracket, 0 deaths) in Sethraliss +10 versus **103.8k overall DPS** (4th percentile bracket, 4 deaths) in Den of Nalorakk +10—representing a **26.3% throughput drop** primarily caused by downtime from deaths and reduced cooldown cadence.
- **Resource Engine & Buff Uptime Gap:** Benchmark comparison revealed that high-tier throughput is driven by Void Metamorphosis extension via Devour spam:
  - **Void Metamorphosis Uptime:** 41.71% (Veritass) vs. 58.68% (Chandemon).
  - **Eradicate Buff Uptime:** 12.30% / 92 procs (Veritass) vs. 35.92% / 218 procs (Chandemon).
  - **Devour Cadence:** 4.52 CPM (Veritass) vs. 18.48 CPM (Chandemon).
  - **Collapsing Star Cadence:** 1.71 CPM (Veritass) vs. 3.71 CPM (Chandemon).
  - **Void Ray inside Metamorphosis:** 49.0% of beam damage inside Meta (Veritass) vs. 70.4% (Chandemon).
- **Over-reliance on Manual Builders:** Veritass cast baseline generators significantly more often than benchmark play (Reap: 1.11 CPM vs 0.49 CPM; Cull: 1.29 CPM vs 0.98 CPM).
- **Defensive & Consumable Usage:** Veritass used 0 combat potions across both runs. In Den of Nalorakk, all 4 deaths occurred from unmitigated physical/bleed overlaps where Blur was either on cooldown or used reactively right before death.

| Metric | Temple of Sethraliss +10 | Den of Nalorakk +10 | Chandemon (+21 Benchmark) |
|---|---|---|---|
| **Duration** | 21:40 (1,300.7s) | 35:33 (2,133.3s) | 28:34 (1,714.4s) |
| **Overall DPS** | **140.8k** | **103.8k** | **463.5k** |
| **Bracket Rank % (ilvl 314)** | 65% | 4% | — |
| **Deaths (Veritass / Total)** | 0 / 0 | 4 / 20 | 0 |

| Metric | Temple of Sethraliss +10 | Den of Nalorakk +10 | Chandemon (+21 Benchmark) |
|---|---|---|---|
| **Void Metamorphosis Uptime** | 41.71% | ~41.8% (Meta Void Ray share) | 58.68% |
| **Eradicate Uptime** | 12.30% (92 procs) | — | 35.92% (218 procs) |
| **Collapsing Star CPM** | 1.71 (37 casts) | 1.13 (40 casts) | 3.71 (106 casts) |
| **Devour CPM** | 4.52 (98 casts) | 3.69 (131 casts) | 18.48 (528 casts) |
| **Blur Casts (Uptime %)** | 5 (3.09%) | 4 deaths due to miss/late Blur | 13 (7.59%) |
| **Combat Potions Used** | 0 (0.00%) | 0 (0.00%) | 6 (10.50%) |

## Results by Encounter / Player

### Temple of Sethraliss +10 (Silver Medal, 0 Deaths)

- **Performance:** 140.8k DPS (183.09M total damage), 48th percentile overall, 65th percentile ilvl bracket. Total damage taken was 23.4M (~18.0k DTPS) with zero deaths.
- **Top Damage Sources & Throughput:**
  1. **Eradicate:** 42.39M (23.15% share, 32.6k DPS)
  2. **Collapsing Star:** 37.97M (20.74% share, 29.2k DPS, 37 casts, 1.71 CPM)
  3. **Void Ray:** 32.71M (17.87% share, 25.2k DPS, 89 casts, 4.10 CPM; 16.02M inside Meta)
  4. **Voidfall Meteor:** 22.85M (12.48% share, 17.6k DPS)
  5. **Consume:** 12.22M (6.67% share, 9.4k DPS, 167 casts, 7.70 CPM)
  6. **Devour:** 10.13M (5.53% share, 7.8k DPS, 98 casts, 4.52 CPM)
  7. **Cull:** 6.63M (3.62% share, 5.1k DPS, 28 casts, 1.29 CPM)
  8. **Soulburst:** 6.05M (3.31% share, 4.7k DPS)
  9. **Catastrophe:** 5.02M (2.74% share, 3.9k DPS)
  10. **Reap:** 3.46M (1.89% share, 2.7k DPS, 24 casts, 1.11 CPM)

### Den of Nalorakk +10 (Timer Failed, 20 Group Deaths)

- **Performance:** 103.8k DPS (221.42M total damage), 29th percentile overall, 4th percentile ilvl bracket. Took 38.9M total damage.
- **Top Damage Sources:** Eradicate (51.85M, 23.42%), Collapsing Star (39.51M, 17.85%, 1.13 CPM), Void Ray (32.46M, 14.66%, 3.07 CPM), Voidfall Meteor (27.55M, 12.44%), Consume (18.56M, 8.38%), Cull (12.21M, 5.52%), Devour (11.08M, 5.01%), Reap (7.91M, 3.57%).
- **Veritass Death Log Analysis:**
  - 03:05: Died to Keen-Eyed Striker Razor Dive ticks (~50k–70k bleed ticks).

- **04:05:** Took 1.08M damage in 11.6s from Razor Dive (558k), Feast of Misery (337k), and Rotten Supplies (186k). Blur was on cooldown.
- **05:14:** Took 1.78M damage in 8.5s; killed by a 288k unmitigated trash melee strike. Blur was activated late (1.9s before death at 10% HP).
- **36:12 (Nalorakk Boss Wipe):** Overwhelmed by Demoralizing Scream (309k), Echoing Fury (141k), and Echoing Maul (408k unmitigated strike, 181k overkill).

## Recommendations

1. **Prioritize Devour to Maintain Void Metamorphosis:** Avoid spending GCDs on basic manual generators (**Reap** / **Cull**) once Void Souls are active. Maximize **Devour** frequency to generate Void Souls, extending Void Metamorphosis uptime past 50%.
2. **Accelerate Collapsing Star Cadence:** Send Collapsing Star on cooldown without holding it between packs to increase cast cadence from 1.13–1.71 CPM toward benchmark levels (~3.7 CPM), which directly increases **Eradicate** buff uptime.
3. **Use Blur Proactively:** While Blur is not required for DPS in non-lethal runs, pop Blur proactively prior to heavy physical/bleed overlap mechanics (e.g., Keen-Eyed Striker Razor Dive or Nalorakk Echoing Maul) or to protect stationary **Void Ray** channels.
4. **Pre-pot Combat Potions:** Bind **Potion of Recklessness** to primary cooldown windows/lust packs to capture missing burst potential (benchmarks utilize ~10.5% potion uptime).
